IS IT RIGHT TO ADVERTISE COCA COLA?

Men who play the wily game of politics have discovered that the best way to distract the attention of the public from their own shortcomings is to make a loud-mouthed sensational attack upon someone else. As the cut-tle-fish eludes its pursuer by clouding the surrounding water with the con-tents of its ink sac, so the political adventurer takes advantage of the ignorance and prejudices of the people to escape from his indefensible position by muddying the waters of public

A case in point is the recent attack made upon the religious press fo carrying Coca-Cola advertising. This attack was made by political the salphosed to be an expert fundamental sul' against the Coca-Col Compan, was humiliated by having to acknowledge that he could not qualli a an expert. The court decided in favor of 'e Coca-Cola Compan, is it was clearly 'own that the only essential 'ifference be-tween Coca-Cola an coffee or tea is that the former contains only about half as much caffeine a. the latter and

that the flavor is different.

The question as to whether it is right to advertise Coca-Cola seems to resolve itself therefore into the question as to whether it is right to advertise coffee tea, chocolate, cocoa and other bever ages of the caffeine group.-Adv.

Convict Made Pets of Mice. An interesting story of a convict and his two pet mice is told in the report of Captain Hanson, the prison commissioner of London.

Captain Hanson said the convict. who was imprisoned at Parkhurst, had two pet mice, but was ordered to another prison, where he was unable to take his pets. Captain Hanson promised to have them cared for and himself went to the cell for the mice.

"Never shall I forget the parting scene," continued the officer. man took each of the mice, calling them by name, kissed them, and then put them in a little box he had lined with flannel, and with them a piece of bread and a piece of cheese he had gaved."

"Cuss" If it Helps.
The use of profanity, if it imparts a feeling of satisfaction, is not condemned by a leading professor of Eng-.tsh, H. C. Long, of the Carnegle Institute of Technology.

This form of expression is artistic, according to the profsesor, who substantiates his ideas by pointing to the reputation of George Washington, who, he says, was an artist in profanity.

Professor Long is quoted by the Tartan, the Carnegie "tech" paper, as fol-

"To become profane on trivial occasions is surely to deprive this remedy for human ills of its virtue by degrading to inferior use. Washington's reputation as a perfect and secure artist in the profane was gained on two or three occasions only, when he felt the frenzy of great provocation."

The Tortures of Prickly Heat and all skin affections are quickly alleviated and in a short time completely cured by using Tyree's Antiseptic Powder. 25c. at druggists. For free sample write J. S. Tyree, Chemist, Washington, D. C .- Adv.

A Legal Opinion.

"A cat sits on my back fence every night, and he yowls and yowls and yowls. Now, I don't want to have any trouble with Neighbor Jones, but this thing has gone far enough, and I want you to tell me what to do."

The young lawyer looked as solemn as an old, sick owl, and said not a word.

"I have a right to shoot the cat, haven't I?"

"I would hardly say that," replied young Coke Blackstone. "The cat does not belong to you, as I understand it." "No. but the fence does."

"Then," concluded the light of law, "I think it safe to say you have a perfect right to tear down the fence."

"Tango."

A student looked up the word tango" in a Latin dictionary. This is what he found: "To take in hand, carry off, to be contiguous to, to strike, beat smear.

Ready to Be Dished.

"Why do they talk about laying bills "Because they mean to dish them."

MUSKOGEE FEDERAL COURT WILL TRY TO MAKE SHERIFF TELL WHY HE DID IT.

ARRESTED SIX U. S. OFFICERS

Refuse to Plead and Are Put Into Jail -Government Men Who Took Eleven Alleged Bootleggers Are Arrested on Prisoner's Complaint.

Muskogee, Okla., June 28 .- An order was issued by the federal court here this afternoon, commanding W. E. Mc-Cullough, sheriff of Tulsa county, to appear and show cause why he is holding in custody Harry A. Larson, of Denver, chief officer of the government in the suppression of the liquor traffic and five of his deputies.

The order was made in a habeas corpus proceeding to secure the release of Larson and his men. They are charged with unlawfully holding up and searching citizens and vehicles for liquor at the Tulsa end of the bridge across the Arkansas river Tuesday night, at which time a caravan of farm wagons loaded with liquor was captured by Larson and his men,

D. H. Linebaugh, United States district attorney, has called upon Governor Cruce and Attorney General West to cooperate in wiping out the traffic at Tulsa. The governor has not replied. As a result of the arrest of Larson and his men, the federal authorities have declared relentless war on the bootleggers of Tulsa county. A clash with the state authorities is expected.

WILL REDUCE R. R. RATES.

Oklahoma 2-Cent Fare to Be Obeyed Pending Court Decision.

Oklahoma City, June 28-Two cents a mile will be the passenger charge on all the larger Oklahoma railroads after the first week in July. At a conference between Attorney General Charles West, representing the state, and attorneys representing the railroads, which enjoined the state from operating the law, an agreement to return to the rate provided by the Oklahoma constitution pending the final settlement of the case in the federal court was reached Friday. The old rates will be placed in effect just as soon as tariff sheets can be prepared by the railroads.

No definite date was announced, but it is expected to take place during the first part of July. It is agreed in the stipulation signed by the representatives of the state and the railroads that the final trial of the case on its merits shall not take place before January 1, 1914.

The following railroads, through attorneys, have signed the stipulation: Atchison, Topeka and Santa Fe, Gulf Colorado and Santa Fe. Chicago, Rock Island and Pacific. St. Louis and San Francisco, Missouri, Kansas and Texas and the Kansas City Southern,

In January, 1910, an injunction was granted by Judge W. HOOK, SITTING for Judge J. H. Cotteral of the western district of Oklahoma, to the Santa Fe. Missouri, Kansas and Texas, Kansas City Southern and Midland Valley railroads restraining the state from enforcing the rate law calling for a two cent fare. The case was appealed to the circuit court of appeals at St. Louis and the decision of the lower court was sustained. West carried the case to the supreme court of the United States, where it is still pending.

Five Dead From Heat Wave.

Chicago, June 28. - Five deaths and numerous prostrations teday were attributable to the heat wave, which shows no signs of soon diminishing. At 4 p. m., the temperature was a fraction over 96, which, according to the

weather bureau, was almost as bot as it was along the Ohlo river. The weather report said the warmest place in the country was Pierre, S. D., where the maximum temperature was 104, Free distribution of ice in some sections of Chicago's crowded tenement district helped reduce the suffering, which was intensified by humidity.

President Postpones His Vacation.

Washington, June 28.-President Wilson late today brushed aside all plans for a week trip to Cornish, N. H. -the summer capital-to examine immediately the tentative agreement reached between Attorny General Mc-Rynolds and the railroad attorneys for the dissolution of the Union Pacific merger in order to prevent if possible, the great railroad combination from being thrown into the hands of a re-

Sinking Ground Startles Farmers.

Hoisington, Kan., June 28.-Fissures varying from a few inches to a foot and one-half in width and extending several feet into the ground have opened up in L. E. Baker's alfalfa field near this city and are causing a great deal of speculation. There has been no indication of an earthquake but the ground seems to be sinking away. The fissures were discovered when Baker missed one of his horses and found it field everywhere he imprisoned in one of Bookist free. MILK CRUSADE SAVES BABES

Stations for Distributing Infant Food Are Constantly Increasing In Various Cities.

A constantly increasing number of cities of all sizes are establishing milk stations and dispensing milk, whether pure whole milk, certified, modified, pasteurized or sterilized milk to mothers of babies that must be bottle fed. Some of the cities in which such institutions are maintained are: Albany, Baltimore, Boston, Buffalo, Chicago Dayton, Detroit, Hartford, Honolulu, Indianapolis, Kansas City, Mo. Lawrence, Mass., Louisville, Lowell, Milwaukee, Newark, New Bedford, New Haven, New York, Peoria, Pittsburgh, Providence, Rochester, St. Louis, Springfield, O., Waterbury, Wilkesbarre, Worcester, Yonkers, Utica.

The milk station is simply a room sufficiently large to accommodate the patrons and equipped with a large ice box, a desk, some chairs and a table. An ordinary store is suitable for a station and sometimes, as in the case of the station at Utica, N. Y., a school room may be used for the purpose The station is usually under the charge of a nurse, and a physician is in attendance at stated hours.

QUICKSILVER BAD ON TEETH

Fumes of Mercury Produce Salivation and Miners Seldom Live More Than Two Years.

Quicksilver miners follow the most unhealthy trade in the world. The fumes of the mercury produce con-stant salivation, and the system becomes permeated with the metal; the teeth of the unfortunate men drop out, they lose their appetite, become emaclated and, as a rule, seldom live long er than two years.

Chloride of lime, employed by bleachers, frequently destroys the enamel and dentine of the teeth. But phosphorus, used so largely in the n-anufacture of lucifer matches, affects a very large number of persons. women, girls and children greatly preponderating.

People who are affected by the teeth becoming soft and translucent; they break off close to the gums.

Dr. Hesse of Leipsic states that ba kers are likely to suffer from decayed teeth on account of the flour entering the mouth during work collecting on and around the teeth, where it decomposes and generates an acid destruc tive to dentine.

Red Tape in France.

A curious little monument to French red tape is to be seen at the Petit Palais. The clock in the building has marked the same hour for the last 13 years, although it is in perfect re-The explanation borders on the ridiculous.

At the close of the Paris exhibition 13 years ago a busybody of an official stopped the clock for no other reason than that the exhibition was closing its gates. Since then it has remained stationary, for the simple reason that it does not appear on the list of clocks which the official clock winder to the municipal council has to attend to, and until some particularly energetic member of the council attends to the matter the present state of affairs is likely to continue,

HELEN KELLER IS OUTDONE

Wisconsin Girl Born With Only One Sense, That of Touch, Graduates From School for Deaf.

Born deaf, blind, and dumb, with the additional handicap of having but one leg, Miss Anna Johnson, Wisconsin's Helen Keller, graduated from the Wisconsin School for the Deaf.

Crippled from babyhood and with only one sense, that of touch, to aid her, Miss Johnson entered the school nine years ago at the age of thir-Up to that time she had recelved practically no education. During her stay here she was taught to hear, has won high honors in history and literature has become an accomplished seamstress and wicker basket maker, and has written several papers of great merit on historical sublects.

Her triumph, however, came recently, when she delivered her commencement essay by word of mouth.

Aluminum Safe for Cooking.

Prof. John Glaister of Glasgow university tested aluminum cooking utensils to ascertain if food was in any way injured by being prepared in them. The only substances that dissolved any of the metal were oranges, lemons, brussels sprouts and tomatoes, but even in these cases the quantity was so small as to be abso-

lutely harmless.

Highest Tower in the World. Should Buenos Ayres carry out a project now under contemplation the city will erect the highest tower in the world, overtopping that of Eiffel by 189 feet. It is planned to put the steel structure up a height of 1,173 feet, and a statue at the top will be surmounted with an electric light of 1,000,000 candlepower. The tower, as plans have been drawn, will have facilities for social gatherings, cafes. restaurants, library, billiard, rooms gymnasium, as well as a wireless telegraphic station and a meteorological observatory.
